

Flagship Package (to be purchased by schools or parents):

Schools resources include:

- **Dedicated teacher resource packs and plans for each programme**

Comprehensive resources for our courses, based on innovations that students can undertake during the workshops, including:

Course Overview

Lesson Plans and Resources List

Powerpoint Presentations (Customisable), prepared for each lesson and including audio and video resources

Pupil Workbooks, including Assessment Points

- **Consultative scheduled calls with a UK I.P advisor (2 calls, via skype). Each call approx. 30 minutes.**

Spend time with one of our accredited and experienced advisors who are available to discuss the programmes in great detail with each teacher and to coordinator resources, ideas and practical assistance.

- **‘Pathway’ connection resources for schools, connecting one programme (or family) to another**

Enabling teachers to connect the programs together at their convenience for full optimisation of each course, catering for your interests and education routes in the curriculum.

- **Home ‘extension’ pack for teachers to use as a flipped classroom**

Creating an independent environment for students who want to continue their practical studies at home with parents, this enables teachers to monitor students’ progress in using the practical’s as a base to create an immersive culture at school where innovation is a high priority.

-

- **Entry into our international 'Unite Life' Magazine**

Students can enter their photography work into our international magazine, showcasing exemplary their visual arts work created through working with Imaging Partnership.

- **Learning Management System templates for teachers in integrating programmes into emerging industries**

Proven systems to help teachers access our practicals and monitor students' progress through their imaging practicals and demonstrations.

- **Each school qualifies to be certified as an International Imaging Partnership Centre.**

This means they're able to teach and collaborate with other schools their innovations and ideas towards tangible working models.

- **Use concepts / ideas from students to further innovations in different areas (e.g: energy / healthcare / consumer tech) through our partnerships**

Our partnerships with private sector organisations are based on utilizing student's concepts and ideas and developing them with large technology / engineering companies who are actively looking for new burgeoning ideas to unlock new market place opportunities. We therefore create revenue streams for schools who use this approach.

- Programme updates automatically occur during August for Northern Hemisphere Countries
- Updates occur during January for Southern Hemisphere Countries
