Outline for school teachers to deliver – online products

Our aim in working together with you is to develop the next generation of world class engineers, designers and scientists through innovative, inspirational, technical and academic learning.

Our Ethos

Imaging Partnership will create an outstanding learning environment where students will be passionate and committed to developing the creative skills required for a career in maths, science, engineering and technology.

Imaging Partnership students will become:

- Successful team leaders
- Confident and resilient learners
- Positive with a 'can do attitudes'
- Creative, caring and enterprising
- Technical and reaching high academic standards

This policy aims to:

Promote the offer of activities which both broadens and enriches the compulsory curriculum offered by Imaging Partnership.

Promote enrichment activities which will fulfil a social, cultural, charitable educational role;

Ensure that all teachers receive appropriate resources and plans in relation to the activities being offered;
